

Mesh Container

Gate latch
door can be open
when stacking

Spring hinge
mesh panels are collapsible
and attached by spring hinges

Stopper
ensuring stack stability

Mesh panel
Rigid and durable
mesh panels by Butt-welding

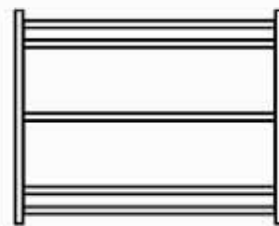

Bending handle
easy to open and close door

Steel U-Beam
U-Beam at the bottom
ensure the loading capacity

Folding process view

1. Warehousing Rationalization

With unified specification and fixed capacity, the folding wire mesh container makes it easy for inventory count. It can be used separately to store a small amount of goods, or stacking multiple storage cages for the storage of large quantities of goods.

2. Space Saving

Four layers of wire mesh storage cages can be stacked up for storage through forklift or hoist, which makes full use of warehouse space. When not in use, they can be folded and piled, saving space.

3. Application Diversification

This product can be used in conjunction with multiple means of transport in the entire production process from the incoming of raw materials to the leaving of finished products. It can save cost and reduce goods damage during handling.

4. Use Simplified

This storage cage is a foldable tool. It is easy and safe to operate during use. It is convenient to fold at no load.

5. Type Diversification

We offer products which can be opened in half or in full. Products meeting special requirements, such as one-piece structure with top cover, upper and lower open type, and bottomless type fitting the pallet, are also available.
