

DOUBLE THREE

ROLL CAGE WITH PLASTIC PALLET

Roll Cage with Plastic Pallet

Resin Fixing Part A for Hanging Rod

Resin Fixing Part B for Hanging Rod

Lightweight reinforcing rib, more solid

Clamping piece galvanized externally

plastic pallet bottom

swivel caster with brake

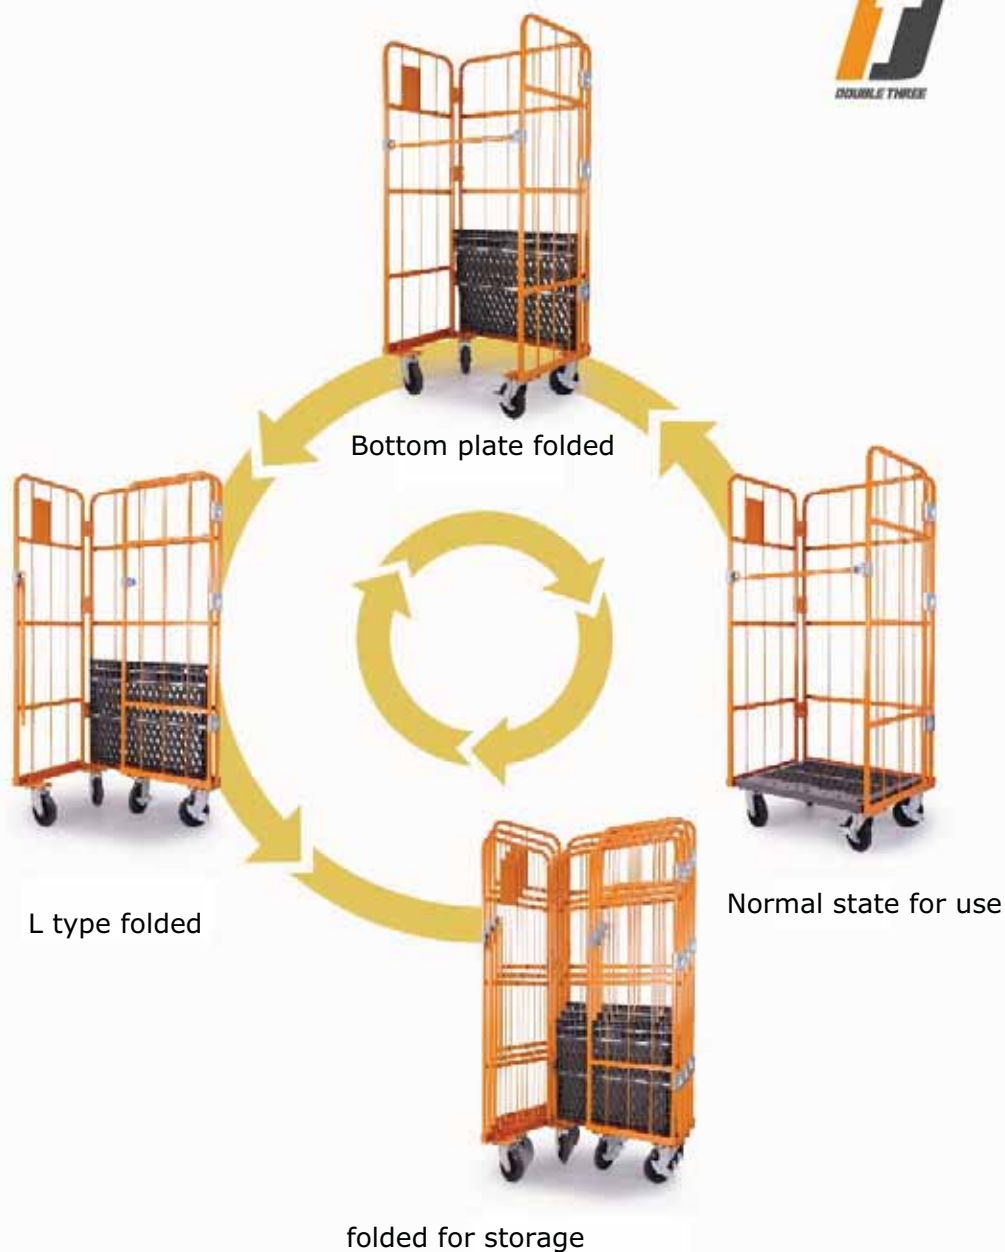

Application

- The plastic pallet roll cage plays an important role in the production-oriented enterprises. Flexible use of this tool can greatly improve the efficiency in the whole process from raw material incoming to finished products leaving.
- This device is widely used for cargo distribution in a lot of fields, such as food, electronic, logistics, etc.

Lightweight

Silent

Features

1. Compared with metal bottom plate, the resin bottom plate is lighter and has better air permeability and drainage
2. The adoption of reinforcing rib structure ensures the stability of the plastic pallet roll container while realizing lightweighting.
3. The linkage design of bottom plate and pin lever makes this wire mesh product easy and reliable to operate.
4. The bottom plate is reinforced by the cylindrical metal tubes and its weight-bearing capacity is improved.
5. The bottom plate with the high-quality rubber wheel achieves quietness.
6. The mounting plate of the caster adopts a reinforcing rib structure which increases the strength of the plate and reduces costs.
7. The surface treatment of powder coating makes the plastic pallet roll container beautiful and durable with long service life.
8. Custom products are available as per customer needs.

Specification

Mode	External dimension W×D×H (mm)	Internal dimension W×D×H (mm)	Weight (kg)	Load (kg)	Capacity (m ³)	Surface treatment	Color	Packing Qty	
								40GP	20GP
DT-RB1003P	850×650×1700	790×590×1450	40	500	0.68	Powder coating	Orange	150	73
DT-RB1005P	1100×800×1700	1040×740×1460	49	500	1.12	Powder coating	Orange	110	50

Caster: 6", silent rubber wheel, 2 swivel casters and 2 swivel casters with brake.
